

EXECUTIVE SUMMARY

The super-power of mRNA to save lives with transformative investment opportunity

mRNA vaccines have been proven safe and effective to save lives and help to end the pandemic. Probably you may have experienced the amazing benefit of mRNA vaccines yourself!

Navigate the jungle of market opportunity to breakthrough investment in mRNA technology for you and your customers.

The COVID pandemic has affected us all. Globally, COVID has cost over \$28 Trillion dollars and 20 million lives. Globally we suffer from over 9,000 diseases. But only about 500 diseases are currently treatable. Diseases are costly, deadly and tragic. Every person and every family suffers from disease.

With mRNA vaccine technology, Normax aims to be a trusted guide for your journey to health and happiness and competitive financial returns via Normax financial mRNA vaccine products to suit most any risk/return appetite. Normax can help with the diseases that are important to you and your customers and generate competitive returns with powerful social impact. Normax has engaged a global team of experts and companies to deliver on the mission for our customers.

In principle, mRNA vaccine technology can be developed to prevent or treat any disease. All life is based on proteins which are programmed by DNA. When DNA is translated into mRNA, your body produces the proteins needed for your life and your health. Normax mRNA Vaccine Research, Development and Manufacturing can generate vast social impact and highly competitive return on investment for institutional investors.

Our mission:

- deliver 100 novel mRNA vaccines with Vax Factories in 100 countries
- deliver a new mRNA vaccine in 100 days in event of Public Health Emergency (PHE)

The journey of life is the journey of the hero. With the super-power of mRNA to save lives you can be a hero too! Join us in our mission for global social impact and competitive financial performance of mRNA Vaccine products and mRNA Vax Factories by Normax.
